KITTY ANITA GWOLITYA

Technical Project Manager | PRINCE2 | Technology Deployments and Product Launches | MSc Computer Science and MSc Economics

Eastbourne, UK • 07927 196885 • anitagwolik@gmail.com • GitHub • linkedin.com/in/k-a-g/

PROFESSIONAL SUMMARY

Technical Project Manager with an MSc in Computer Science (Distinction) and over four years of experience delivering technology deployments and business system change across Switzerland, the UK, and Uganda. Managed a $5.2M portfolio across three concurrent projects with PRINCE2 governance and Microsoft Project, owning schedules, milestones, dependencies, risks and vendor contracts, and achieved 87% ROI. Led cross-functional teams through an MIS rollout integrated with SAP ERP, cutting reporting time by 60%, and reported progress to funders, senior management and government ministers. Support new product launches at Apple Retail, coordinating stock, queues and customers through internal systems. Apply technical knowledge in Python, SQL, Git and systems security to work credibly with engineering teams.

CORE SKILLS

Project Management: Project Planning, Schedules and Milestones, Dependency and Risk Management, Scope and Change Control, Budget Management, Status Reporting, Project Documentation, PRINCE2, Agile and Scrum

Deployment and Delivery: Technology Rollout, New Product Introduction, Stage-Gate Governance, Vendor and Procurement Management, Stakeholder Coordination Across Regions

Tools: Microsoft Project, Asana, Toggl, GitHub Issues, Microsoft Teams, Power BI, SAP ERP, SQL Server, Excel

Technical Fluency: Python, Java, SQL, Git, Vulnerability Assessment (OWASP ZAP, Nikto), GDPR, Computer Systems Security

PROFESSIONAL EXPERIENCE

Specialist, Apple Retail
Aug 2026 to Present

- Support new product launches in-store, managing high customer demand, limited stock and long queues with the internal queue management system.
- Use the product reservation system to give customers a guaranteed unit while the team manages stock allocation, and guide customers to online delivery to reduce in-store pressure.
- Translate technical issues into plain, practical guidance for customers and colleagues. Customers gave positive feedback on my product knowledge and patience.
- Adapt to changing priorities and stock conditions in real time and keep the team informed to maintain consistent service during launch periods.

Digital Marketing Assistant, We Are Auntie CIC
July 2026 to August 2026

- Delivered two community workshops within a fixed 70-hour budget, coordinating Brighton and Hove City Council, DWP and the university placements team.
- Managed scope and change control, re-planning a workshop from 2.5 to 1.5 hours, tracked delivery in Toggl against a two-phase plan, and built a 47-organisation partner database.
- Owned an internal timesheet web app from scoping to live launch.

Student Ambassador, Student Recruitment and Outreach (Part-time), University of Brighton
Dec 2025 to Present

- Coordinate with Student Recruitment, International Recruitment and Marketing teams to run open days, UCAS fairs and school visits to plan, adjusting communication for students, parents and teachers.
- Nominated for the Calm in Chaos Award for composure and reliability at high-volume events.

Business Development Manager, Digital Platforms and Investment Programs, Private Sector Foundation Uganda, Mastercard Foundation Program
July 2022 to July 2025

- Managed a $5.2M co-investment portfolio across three concurrent projects and 30+ SME initiatives, building schedules in Microsoft Project and controlling scope, budget and risk through PRINCE2 stage gates.
- Led cross-functional teams through the full delivery of an MIS integrated with SAP ERP, from requirements gathering to deployment, cutting monthly reporting time by 60%.

- Managed procurement and vendor contracts for project delivery and approved quarterly fund disbursements against agreed milestones with finance, audit and M&E teams.
- Maintained a weekly risk log with each project team, tracking risks, issues and dependencies, and improved portfolio quality by 12%. Achieved 87% ROI on the portfolio.
- Gathered requirements from 150+ SME end users and turned 40+ pain points into shipped product features, reaching 90% adoption within 12 months.
- Applied change management using ADKAR and tracked benefits against a baseline, confirming a 25% growth in partner revenue against the business case.
- Reported progress quarterly to funders and senior management and presented project impact stories to government ministers to inform policy change.

Research and Market Analysis Consultant (Remote), University of Zurich, ONtrack Diagnostics MedTech Project
Oct 2020 to Dec 2021

- Managed a multi-market feasibility project across 3 European countries, coordinating clinician interviews and market research to defined deadlines.
- Built financial models forecasting revenue within 5% variance, supporting a successful funding application.

TECHNICAL PROJECTS | MSC COMPUTER SCIENCE, UNIVERSITY OF BRIGHTON

Final Project, Responsible AI and Credit Risk Model Governance | Python, scikit-learn, XGBoost, SHAP, Git

- Planned and delivered an independent research project in two phases against weekly milestones and supervisor checkpoints. Built a SHAP explainability framework for credit-risk models with explanation stability above 99% for Random Forest, relevant to UK regulation of automated lending.

Mission Control AI, Decision Intelligence Dashboard | Next.js, TypeScript, OpenAI API, REST APIs, Vercel

- Built and deployed a full-stack AI dashboard to detect and rank project risks in real time, cutting cross-team coordination time by 5 to 7 hours per week.

Internal Timesheet Web Application, AI-Assisted Development | Web application, role-based access

- Took the application from scoping to live launch using AI-assisted development, with role-based access, data protection controls and admin reporting.

Security Analysis, Web Application and Malware Assessment (90%) | Kali Linux, OWASP ZAP, Nikto, YARA

- Identified and documented high-severity vulnerabilities, including SQL injection and remote file inclusion, and recommended controls such as a web application firewall.

IT Ticketing System, Project Manager | Microsoft Teams, GitHub Issues, Java, JavaFX, SQL

- Led a team of 4 through a full build cycle, owning scope, task allocation and timeline. Set the Git branching model and review process, cutting merge conflicts by 70%.

GDPR-Compliant Event Database, Data Management | SQL Server, Power BI, Lucidchart, ERD

- Designed a relational database with privacy-by-design controls, classifying data per GDPR Articles 4 and 9, connected to Power BI dashboards.

Credit Risk Prediction, Machine Learning and Explainable AI | Python, scikit-learn, Random Forest, SVM, Gradient Boosting

- Built and compared classification models, selecting Random Forest with an 82% composite score and 92% recall on high-risk applicants, with explainability aligned to GDPR Article 22.

OTHER ROLES

Volunteer Mentor (Part-time), Momentum Mentoring, University of Brighton
March 2026 to Present

- Deliver one-to-one mentoring sessions on communication skills and professional readiness.

EDUCATION

MSc Computer Science, University of Brighton, UK. Sept 2025 to Sept 2026, Distinction average
MSc Economics, Università della Svizzera Italiana (USI), Switzerland. Sept 2017 to Oct 2020
